EDUCATION

Polytechnic University of the Philippines 2022-2026
Bachelor of Science in Computer Engineering Major in Big Data Sta. Mesa, Manila

RELEVANT COURSEWORK

- Data Analysis
- Automation
- System Analysis
- Software Development (Website)
- UI/UX
- QA

EXPERIENCE

Frontend Development Intern, BlastAsia Inc. August - September 2024

- Focused on Figma and code cleaning for frontend development.
- Assisted in the implementation of design systems and reusable components to ensure consistency across pages.
- Gained exposure to frontend frameworks/libraries such as React.js and Angular Coordinated with backend developers and QA teams to debug and resolve UI-related issues.

Data Science Intern, Prime Outsourcing Inc. July- September 2025

- Analyzed complex HR datasets and developed automated operational workflows using App Script and n8n to pinpoint bottlenecks and improve reporting efficiency.
- Designed and maintained interactive HR dashboards (utilizing tools aligned with Power BI capabilities) to monitor key performance indicators and deliver actionable insights to management.
- Built a GPT-powered internal assistant, optimizing service efficiency and streamlining cross-functional operations.
- Partnered with IT to configure and optimize the office WiFi mesh network, demonstrating strong problem-solving skills and operational support.

PROJECTS

DepEd Enrollment Dashboard | React, JavaScript, Python, Pandas, Matplotlib June 2025

- Cleaned and processed large-scale Department of Education datasets using Python and Pandas to identify performance progress and operational trends.
- Built statistical models and generated analytical charts to translate complex data into clear, meaningful visual narratives.
- Developed a dynamic, web-based interactive dashboard to present high-value insights regarding 2024 enrollment metrics.

BIONANA: IoT-Based Liquid Organic Fertilizer Processor | Flutter, Dart, Firebase, SQL, IoT Hardware May 2026

- One of the proponents who developed an IoT semi-automated system that processes banana pseudostem waste into liquid organic fertilizer.
- Flutter/Dart mobile app and Firebase backend to interface with extraction hardware and monitor real-time sensor data.
- Deployed the prototype for field testing in Nueva Ecija, validating software quality and ergonomics against ISO 25010 and ISO 9241 standards.

AXIS (Automated eXtraction & Integration System) June 2026

- Developed a SaaS platform for automated extraction and integration of government form data.
- Served as System Analyst and QA, gathering requirements, defining specifications, and testing system functionality.
- Designed system workflows and architecture using Next.js, Supabase, and React, while supporting AI/backend integration.
- Collaborated with developers through Jira to track tasks, bugs, testing, and feature improvements.

Beyond The Cart – Marketplace Seller Performance Analytics (Olist Brazilian E-Commerce Dataset) July 2026

- Engineered an end-to-end e-commerce analytics system analyzing 100K+ order datasets to monitor sales KPIs, delivery performance, and operational bottlenecks.
- Architected a PostgreSQL data warehouse, constructing SQL views and Python ETL workflows (Pandas, Psycopg2) to aggregate raw operational data into business-ready pipelines.
- Developed interactive Power BI dashboards utilizing DAX and custom data modeling to deliver actionable insights on seller performance and supply chain logistics.

TECHNICAL SKILLS

- Programming:** Python, JavaScript, TypeScript, Dart, SQL, R, C, HTML/CSS
- Framework/Library:** React, Vue.js, Next.js, Node.js, Flask, Flutter, Tailwind CSS, Pandas, Matplotlib, Seaborn
- Tools:** Git/GitHub, Firebase, Power BI, Google Looker Studio, Microsoft 365, Jira, Trello
- Design:** Figma, Canva, Adobe Photoshop, Wix
